

AFR Regen Optimizer

Today's new DPF exhaust systems are costly to run and maintain. The AFR Regen Optimizer reduces the need for cleaning, extends DPF life and eliminates regens and allows extended ideling times.

Eliminate Expensive Service Calls for Regen Issues

Get More Life From Your DPF Filter

Extend DPF Cleaning Cycles

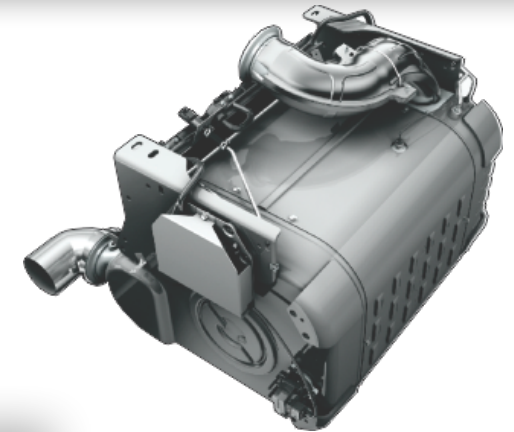

Simple Installation

The AFR system is easy to install and works with Detroit and Cummins engines newer than 2010. Installing the controller under your dash and connecting it to your J1939 connection is all you need to do to start saving money.

Big Cost Savings

The AFR Regen Optimizer regulates your rpm to maintain maximum burn rates for your DPF system when it is not under load, reducing moisture and soot build up during extended ideling periods.

Reducing moisture and soot build up and initiating regens automaticaly, reduces mainteneace and helps you avoid expensive DPF cleaning costs.
